

Welcome to the expansive world of Drift!

In this game the racer has one objective, drift as far and as long as they can. Their reward? Infinite riches and fame.

Jokes aside... The racer is a retired race car driver obsessed with achieving the cleanest drifts. While they don't race competitively anymore, they are always trying to improve their drifting technique. They are also an avid gun owner as they occasionally enjoy shooting out their window.

Use the manual gear shift (or player 0 joystick) to control the racer's car. Move the gear right to drive straight. Drifting is not as easy as it seems. The racer must rapidly change the gear to down shift then back to drive in order to drift down and continue moving forward.

Repeat this process for each turn and the racer might be rewarded with new race tracks made of various colors. Goodluck!
